About

Frontend engineer. My expertise mostly lies within React and Vue ecosystem. I love technologies - design systems, build tools, monorepos - but over the years I found that building a product you should think simpler. Product first. Technologies second.

Experience

NRNU "MEPhI" · Student   *Sep 2012 - Feb 2018*
Moscow

Department of theoretical and experimental physics (T), Master's degree.

IBRAE, lab. 13 · Frontend Engineer   *Feb 2018 - Jul 2021*
Moscow

The lab worked on MOUSE project wrapping cutting-edge CS with a Flask server and providing Vue web app full of high-freq visualization and interactivity.
- introduced UI library to speed up development process
- integrated one-click-away "user feedback" feature to speed up feedback loop
- designed an onboarding process helping end users to get started

Interfax · Senior frontend developer   *Jul 2021 - Aug 2023*
Moscow

In the core team we worked on a publishing system and a news reader application. We built custom feeds, insanely resizable layout, multi-window UI, news sharing, LCP optimizations and tons more.
- set up the frontend stack and architecture
- introduced OpenAPI codegen for type-safe backend/frontend communication
- built a type-safe design system improving TTM and visual consistency
- integrated semantic release workflow to make releases easier for the team
- led the frontend team

Yandex · Senior frontend engineer   *Sep 2023 - Present*
Serbia

Yandex Funtech, frontend infrastructure team. Working on design system for Yandex Plus services. Doing a11y, i18n, monorepo tooling, Figma-to-code sync, usage monitoring, CLI tools, CI/CD pipelines, ADR process and more.

Skills

Stack   Typescript, Javascript, Vite, Webpack, Bun, Nx, Turborepo, React, Next.js, Vue, Nuxt, Svelte, Remix, Astro, SolidJS, Prisma, Pinia, TanStack, React Query, ESBuild, Storybook, CSS-in-TS, Tailwind CSS, PostCSS

Soft   Open mind, Creativity, Attention to detail

Languages   Russian (Native speaker), English (B1)

Projects

Life calendar   **Force graph**

A calendar inspired by Tim Urban's post Your Life in Weeks.   Force-directed graph tool powered by Canvas, FSD and Nuxt.
